MAURICE GOODMAN

PhD Candidate · Marine Ecology

312 608 5221

SUMMARY -

As a PhD candidate studying marine ecology and biogeography at Stanford's Hopkins Marine Station, my work uses a variety of statistical and computational approaches to examine climate impacts on population and predator-prey dynamics in coastal marine systems to inform conservation and fisheries management. Prior to beginning my PhD, I worked as a data analyst and field technician for community ecology and behavioral ecology labs at Cal Poly, San Luis Obispo.

ecology tabs at Cat Foty, San Luis Obispo.

PROFESSIONAL EXPERIENCE

2022-Present Independent Contractor

NOAA AFSC / University of Washington

Built species distribution models for a suite of Eastern Bering Sea groundfish and crab species as part of the Alaska Integrated Climate Modeling (ACLIM) project. Produced species range and spatial overlap projections under multiple earth systems models. Created an R "Shiny" based web app for navigating outputs (mgoodman.shinyapps.io/aclim2_sdms_explorer). Currently preparing results for submission to a peer-reviewed journal.

2022 **Independent Contractor**

Granite Canyon Marine Labs

Analyzed data from experiments aimed at reducing wetland agricultural runoff. Produced figures and contributed to writing of peer-reviewed manuscript summarizing results.

2017-2018 Data Analyst & Field Technician

California Sea Grant

Responsible for the analysis, management, and visualization of ecological and social data from Tanzania, Kenya, and Morro Bay, California in the lab of Dr. Jennifer O'Leary. Assisted with writing reports and manuscripts. Full-time.

2016-2018

Research & Dive Technician

Cal Poly SLO

Summer Worked alor

Worked alongside Dr. Ben Ruttenberg to conduct benthic surveys and fish follows on SCUBA to characterize coral community and document parrotfish feeding behavior in St. Croix, USVI. Responsible for entering and managing photo, video, and GPS data, and for gear and boat maintenance. Seasonal.

2016, 2018

Aquarist

Central Coast Aquarium

Assisted in managing, training and mentoring volunteers and interns in the husbandry department. Maintained all tanks and systems, collected and acclimated new animals, curated exhibits, and regularly monitored water quality. Part-Time.

TEACHING EXPERIENCE

2022, 2023 **Instructor**

BIO / OCEANS 143: Quantitative Ecology

Developed and taught 3 weeks of labs and lectures based on material I designed for the previous years' course (see below), focusing on frequentist parameter estimation and species distribution modeling. Assisted students with labs and assignments and graded student submissions.

2021 **Co-Instructor**

BIOS 207: Software Engineering for Science

Cod-developed materials for teaching software development concepts (code documentation, version control, modular programming, testing and validation) for "Just Enough Software Engineering for Science" short course. Led discussions, assisted students with programming challenges, and evaluated student assignments.

2021 **Teaching Assistant**

BIOHOPK 143H: Quantivative Ecology

Designed and taught 3 weeks of labs and lectures on parameter estimation for nonlinear and dynamic models using frequentist and Bayesian principles, as well as species distribution modeling with GAMs (github.com/mcgoodman/quant-eco-2021). Assisted students in learning material taught by other course instructors, held weekly office hours, and assisted students in designing and executing final projects. Awarded Stanford School of Humanities and Science's "Centennial" Teaching Award and Stanford Biology's "Excellence in Teaching" Award.

2019 **Teaching Assistant BIO 85: Evolution**

> Co-developed lesson plans, teaching materials, homework assignments and tests. Led a section where students reveiwed and reinforced material from lecture, held weekly office hours, and graded student assignments. Awarded Stanford Biology departments "Excellence in Teaching" Award.

Teaching Assistant 2017

ZOO 336: Invertebrate Zoology Prepared lab specimens and activities for class, collected new specimens, demonstrated lab methods and dissections to students, and assisted students with lab and field activities.

OUTREACH, LEADERSHIP, & SERVICE -

Hopkins Marine Station Graduate Student Association 2022 - 2023 President

> Engaged the graduate student community in multiple community-building initiatives, including organizing inclusivity trainings, social events, and graduate student retreats, representing grad students to Dean and Hopkins faculty and administrative and DEI meetings, and obtaining funds to renovate grad student work & social spaces. Previously served as webmaster for graduate student association (Fall 2019 - Summer 2021).

Student Liaison MARINE 2020-2022

> Served for two academic years as Hopkins Marine Station's liaison for Monterey Area Research Institutions' Network for Education (MARINE), an organization of of marine science students and early career researchers from seven academic institutions in the Monterey Bay area. Planned networking, social, and community service events.

Founder & Vice President Cal Poly Marine Science Club 2016-2017

Founded and co-lead the Cal Poly Marine Science Club. Organized, planned, and lead events and meetings; managed social media and outreach.

Husbandry & Outreach Volunteer Central Coast Aquarium (Non-Profit) 2014-2018

> Assisted with husbandry tasks such as maintenance of tanks, acclimation of fishes, treatment of diseased fishes, curation of exhibits, preparation of diets, and training of new volunteers. Frequently gave talks and tours to the public, taught grade school programs, and participated in outreach and fund raising. Over 800 hours volunteered.

FELLOWSHIPS, HONORS, & AWARDS

y support Stanford Data Science	Graduate Scholar 50% Tuition & Salary su	2022-2024
Friends of Hopkins Marine Station	Research Grant \$6,500	2022
Myers Oceanographic & Marine Biology Trust	Research Grant \$1,800	2022
Stanford Department of Biology	Excellence in Teaching Award	2021
Stanford School of Humanities & Sciences	Centennial Teaching Award	2021
n & Salary Support National Science Foundation	O19-2023 Graduate Research Fellowship Tuition & S	2019-2023
Cal Poly College of Science & Mathematics	014-2016 President's List	2014-2016
William & Linda Frost Foundation, Cal Poly SLO	Summer Research Scholarship \$2,500	2016
CSU COAST	Undergraduate Research Grant \$500	2016

PRESENTATIONS

Talk Goodman, M.C. et al. Shifting fish distributions impact predator-prey interactions in the East-2023 ern Bering sea. Alaska Marine Science Symposium.

- Talk Goodman, M.C. Global shark fin demand, small-scale fisheries, and reef sharks: A case study in the Northern Line Islands. Stanford Data Science Conference.
- Talk Goodman, M.C. et al. Shifting fish distributions impact predation intensity in a sub-Arctic ecosystem. Ocean Sciences Meeting.
- Talk Goodman, M.C., White. T., Kazdan, J., & De Leo, G. International market demand drives a small-scale Central Pacific reef shark fishery towards collapse. Western Society of Naturalists.
- Talk Goodman, M.C. et al. Ecological consequences of climate induced changes in spatial overlap between Eastern Bering Sea walleye pollock and their predators. Western Society of Naturalists.
- Talk Goodman, M.C., Hannah, S.M., Ruttenberg, B.I. (2017). The Relationship Between Geographic Range Extent and Adult Traits in Coastal Temperate Fishes. Western Society of Naturalists
- Talk Goodman, M.C., Hannah, S.M., Ruttenberg, B.I. (2017). The Relationship Between Geographic Range Extent and Adult Traits in Coastal Temperate Fishes. Cal Poly Annual Student Research Symposium.
- 2017 **Poster Goodman, M.C.** et al. (2017).*Long-Term Monitoring of Sea Urchin Settlement Along the California Coast.* Cal Poly Annual Student Research Symposium.
- Talk Goodman, M.C., Hannah, S.M., Ruttenberg, B.I. (2017). The Relationship Between Geographic Range Extent and Adult Traits in Coastal Temperate Fishes. Central Coast Wildlife Society Annual Wildlife Symposium.
- 2017 **Poster Goodman, M.C.**, Hannah, S.M., Ruttenberg, B.I. (2016). The Relationship Between Geographic Range Extent and Adult Traits in Coastal Temperate Fishes. Western Society of Naturalists

FIELD RESEARCH

2023 NOAA Alaska Fisheries Science Center

Bering Sea Bottom Trawl Survey

Volunteered on a three week survey leg sorting, sexing, and lengthing specimens as part of the annual Eastern Bering Sea bottom trawl survey which collects data needed for stock assessments and other management models. Lead stomach collection for food habits analysis.

2019-2023 **Stanford Hopkins Marine Station**

Various Projects

Palumbi lab: Assisted on field projects in Palau (collecting corals and running heat stress experiments, transplating corals for common garden experiments) and the California central coast (collecting samples via boat on SCUBA, processing samples). **Other:** Various dives to conduct kelp forest ecological surveys and deploy instrumentation for graduate student projects.

2014-2018 Cal Poly San Luis Obispo

Ruttenberg & O'Leary Labs

Ruttenberg lab: Collection of coral reef ecological survey data via SCUBA (see Work Experience section), and surveys of Pismo Clam populations on California coastal beaches from Port San Luis to San Diego. **O'Leary lab:** Monthly collection of cobbles via SCUBA for monitoring recruitment of abalone, surveys of eelgrass and associated fish communities via beach seines and monitoring of permanent plots.

SCUBA Experience & Certifications

AAUS Scientific Diver, 60 ft

PADI Divemaster Now Inactive

DAN Diving First Aid for Professional Divers

2015 - Present
2015 - Present
2015 - Present
2015 - Present

2019, 2022 **REEFS Undergraduate Internship**

Stanford University

2022: Mentored two undergraduate students in building out a control system for conducting multiple stressor experiments in aquaria, developing protocols as part of a pilot study, and analyzing data. Students prepared and presented poster to researchers and other students at Hopkins. **2019:** Mentored an undergraduate student in applying machine learning and statistical approaches to model harmful algal bloom incidence in California.

2016-2018 Undergraduate research mentor

Cal Poly SLO

Established and led a biweekly sea urchin recruitment monitoring program at Port San Luis as part of the larger Santa Barbara Coastal LTER project. Trained several undergraduates in deploying collection media and sorting and identifying specimens.

TECHNICAL SKILLS

Scientific Computing ———

R, R Markdown, & RStudio, Stan, GIS (QGIS, R sf & stars packages), git & github

Statistical Methodology -

Bayesian and frequentist linear, nonlinear, and dynamical models; hierarchical, time-series, and spatial models; R statistics packages (rstan, brms, mgcv, glmmTMB, nlme, lme4, VAST, etc.)

Software Development -

R Shiny web apps

ACLIM2 SDMs explorer: mgoodman.shinyapps.io/aclim2_sdms_explorer Probability distributions lab: mgoodman.shinyapps.io/distributions-lab

Reproducible Scientific Code Repositories

Faiad et al. 2023: github.com/wood-lab/Faiad_et_al_2023_PLoS_One Goodman et al. 2022: github.com/mcgoodman/Goodman-et-al_2022_Ecography Andrzejaczek et al. 2022: github.com/mcgoodman/shark-vertical-overlap O'Leary et al. 2020: github.com/mcgoodman/OLeary-et-al_2020_ESCO
